

# MILNER'S ANODIZING

Milner's Anodizing is the first Job Shop in Northern California to attain Nadcap\* Accreditation for Aerospace Quality Systems and Chemical Processing. Every job done in our shop, including everyday commercial work, is processed to the same quality standard as our Aerospace and Defense work.

We provide Anodizing (both Type II and Hardcoat per MIL-A-8625) as well as Chem-Film (per MIL-DTL-5541 and equivalents) and Passivation (per ASTM- A-967 Nitric 1 & 2 and equivalents). We also offer a number of other surface finishing services including complex custom masking for situations where a part requires multiple finishes. A list of capabilities is shown on the next page.

We test our processes on a continuing basis with full in-house Lab capabilities (Chemistry, Spectrophotometry, Salt Spray, Coatings Weight, Taber etc).

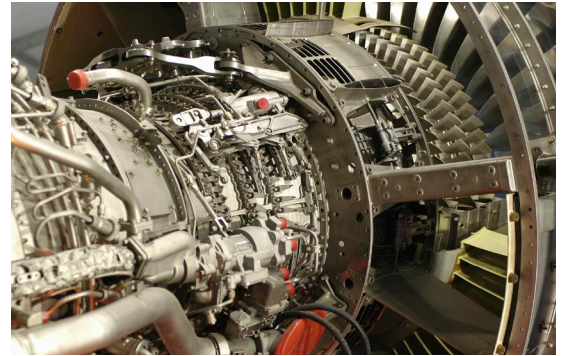

Independent Laboratory analysis is performed periodically to verify our internal results. MILNER'S ANODIZING is totally dedicated to providing the highest possible product quality, fast turnaround and competitive pricing.

After more than 25 years in business and with over 500 customers, Milner's is now involved in virtually every manufacturing activity taking place in Northern California and the Western United States. A few of the industries which we serve are:

- Aerospace & Defense
- Medical Devices
- Automotive and Motor Sports
- Semiconductor Manufacturing
- Electronics Equipment
- Industrial Automation
- Inspection and Measuring Tools
- Lasers
- Precision Machining
- Telecommunications
- Electronic Test & Measurement
- Scientific Instruments
- Solar Electrical Generation
- Specialty Machinery
- Many Consumer Products
- Winery & Food Production

While Milner's has earned an excellent reputation for its sophisticated capabilities, we have also expanded our everyday commercial work. Our business volume doubled from 2003 to 2008, as a result of our attention to quality and aggressive pricing. If you think Milner's is the kind of company you'd like to do business with, please contact us the next time you have a requirement for surface finishing.
